SUMMARY

Computer Science and Technology undergraduate at Nanjing Audit University, ranked first in the major with a GPA of 4.16/5.0. Research interests center on machine learning and data analytics, with one first-author SCI article (JCR Q1), two software copyright registrations, and reviewing experience for the journal *Neurocomputing*. Member of CCF and IEEE.

PUBLICATIONS & IP

Journal Article

- **Taiyu Jin**, Xu Sun, Bing Huang, and Tianxing Wang. A novel hierarchical clustering approach based on granular-ball computing. *Neurocomputing* 665C (2026), p. 132200. (JCR Q1).

  Proposed two granular-ball-based hierarchical clustering methods, FI-GBHC and PB-GBHC, which build hierarchical structures by expanding and merging granular balls with fixed or adaptive radius increments. Experimental results showed strong clustering accuracy with significantly improved computational efficiency.

Software Copyright Registrations

- **Taiyu Jin**. *Intelligent Text Relation Processing Platform*. 2024SR1259547. 2024.

PROJECTS

Sentiment and Topic Classification System (`Bnalyser`)

Independent Project

- Fine-tuned a BERT-based pretrained model to perform sentiment classification and topic identification for Chinese text.
- Built the full workflow independently, covering data preprocessing, model fine-tuning, and GUI desktop application development.
- www.github.com/jin-taiyu/Bnalyser 21 3

Photo Processing Library (`Rust Photo Lib`)

Collaborative Project

- Contributed to a Rust-based photo processing library and designed a composable pipeline spanning image I/O, parameterized recipes, and CLI invocation for image enhancement, portrait retouching, and style transfer workflows.
- Implemented operators for exposure, contrast, tone curves, HSL adjustments, and local masking; wrapped ONNX inference interfaces and integrated face detection, landmark localization, and style transfer models.

EDUCATION

B.Eng. in Computer Science and Technology

Nanjing Audit University

Sep 2022 – Jun 2026

- GPA: 4.16/5.0
- Rank: 1/93

HONORS

15th Lanqiao Cup Provincial Competition
Second Prize, C/C++ Programming, University Category B

Nanjing Audit University
First-Class Comprehensive Scholarship

Nanjing Audit University
Merit Student

SKILLS

Programming

C/C++ Java SQL Python

Tools

Git LaTeX Linux Docker

Professional Competency Certification
Industrial Internet Platform Development Engineer

RESEARCH INTERESTS

Machine Learning Data Analytics

LANGUAGES

English (CET-6: 551)
